

## SANI BK-200 WHITE

Sani BK-200 uses a patented three-step vibrating, sterilizing, and double filtering process. First it uses a vibrating pad to shake dust mites and allergens free from fabric. Then a high-quality UV-C sterilization lamp helps eliminate bacteria, mites and viruses. Finally a powerful motor vacuums up any dust and remnants, while a Micro Allergy Filter ensures that they cannot escape back into the room.

### Specifications

- Power Rating: 450W
- UV-C Lamp: 6W germicidal lamp
- Size: 310 x 295 x 210 mm
- Weight: 2.6 Kg

### Other Features

UV Sterilization Lamp  
Fabric Adhesion Proof System  
UVC Lamp Safety Sensor  
HEPA Micro Allergy Filter  
Transparent Cartridge Window  
Large Capacity Cartridge  
One-Touch Control Button  
Control Display Panel  
Ergonomic Design Handle  
Large Capacity Inhaling System

- A convenient base plate makes SANI BK-200 easier to store and its premium design blends better with any room
